- 86% and below is red status

The Learner Review Procedure

Each learner will have met with their Personal Tutor for a 1 to 1 review to discuss the progress they are making at college and any specific support they may require to help them achieve their targets and qualification.

As part of the review each Subject Lecturer completes a report and then the Personal Tutor summaries these in the Personal Tutor Summary. Targets are then set for each learner.

Review Term: Autumn

Review:

Zenab has missed the start of the course, but that has had no effect on her progress whatsoever. She is a very mature student for her age and also very ambitious. She works very hard to complete all her work to high standard.

Zenab is doing very well in all subjects on the course and gets very good commendations from her teachers. Her grades are very high not anly in assignments but also in homeworks, tests, classwork.

Her attendance and punctuality records to date, show the seriousness and maturity with which she approaches her studies. If she maintains this level of maturity and good work she will be able to go to higher education and realise her full potential.

Issues Raised: Try to complete all corrections to outstanding assignments and achieve as high a grade as possible by the end of January. Then can go on to have a very successful remainder of the course and achieve a good Diploma.

Review Term: Spring

Review:

Attendance = 98%

Punctuality = 95%

Good attendance and punctuality. It shows commitment and application.

You have been progressing well on the course throughout the first and second terms.

You now need a few corrections in U 3 3rd assignment. You also need some corrections in the assignments of U 10.

In Physics you have been doing very well and should keep it up. The same applies to Chemistry.

Your Functional Skills grade in the mock test seems somewhat low. I will offer you extra help during the tutorial to strengthen that area.

Continue to work hard in order to be successful and realise all your ambitions.
