- 91% to 87% is amber status
- 86% and below is red status

The Learner Review Procedure

Each learner will have met with their Personal Tutor for a 1 to 1 review to discuss the progress they are making at college and any specific support they may require to help them achieve their targets and qualification.

As part of the review each Subject Lecturer completes a report and then the Personal Tutor summaries these in the Personal Tutor Summary. Targets are then set for each learner.

To look at punctuation: focus on the rules of capital letters and full stops and

complete a worksheet on it.

You have attended all your lessons so far, although your punctuality could be

improved.

You are a quiet and likeable member of the class, but I would like to see you

participate more in English.

You are good at reading comprehensions. We will be looking at spelling techniques later this term, which will help you with your spellings.

Your punctuality has improved and you are always on time to English classes.

Complete the first assignment of designing and developing a complete website before March.

During the first term the students studied the hardware/software architecture and components which help make up the structure of the internet. This was preparation for an exam which they all took on the first week of December, where all students managed to pass and complete.

Students studied basic HTML coding which is the basic foundation to creating webpages. They then used these skills learnt to help understand and create some simple web pages using Adobe Dreamweaver. These skills will be tested on their first assignment which all students are currently undertaking.
