The Learner Review Procedure

Each learner will have met with their Personal Tutor for a 1 to 1 review to discuss the progress they are making at college and any specific support they may require to help them achieve their targets and qualification.

As part of the review each Subject Lecturer completes a report and then the Personal Tutor summaries these in the Personal Tutor Summary. Targets are then set for each learner.

Review Term: Autumn

Review:

Howard is a very good member of the group. He is a very sensible and mature student with excellent attendance and punctuality records. He seems to have good ability in science but he does not to date seem able to translate this ability onto his assignment work in any of the subjects in science. Howard's prgress seems to be better in Chemistry compared to Physics and Biology.

If there are any issues in any part of the work in each subject he should not hesitate to speak to his teachers. He seems to be very reserved in that area. He has been advised to attend for extra support, for example with mentor students to help him with aspects of his work, but he has not been very enthusiastic. He will continue to be encouraged to do so.

Issues Raised: Howard is extremely mature and I think reasonably able student, who may have forgotten many aspects of the curriculum. His main problem to date seems to be his shyness and reservation in asking for help when he encounters problems in his assigned work. He should feel free to approach his teachers who are all happy and willing to help him and put him in the right path. They will also arrange for any further support he may require
