The Learner Review Procedure

Each learner will have met with their Personal Tutor for a 1 to 1 review to discuss the progress they are making at college and any specific support they may require to help them achieve their targets and qualification.

As part of the review each Subject Lecturer completes a report and then the Personal Tutor summaries these in the Personal Tutor Summary. Targets are then set for each learner.

Comments:

Smart Targets: Improve your punctuality it is poor at 50%. An employer would expect 100%

Good work on theory to date - well done. Do not be tempted to relax for the

next exam as it is highly complex and soi difficult for all.

Jack you are active participant within the group and you show a good degree of enthusiasm to engage in the subject matter of the lesson. Generally you have a mature approach to your work and work well with others in the group. I am very pleased that you have agreed to become a spokesperson / class rep for your study group. Your feedback is valuable to make sure the lessons are as productive for the group as possible.

My only supportive comment would be that you have a punctuality problem. In the real world of work employers and customers expect you to be on time and not be late with your breakfat in your hand.

To date you have passed all the online exams as follows Health and safety Plumbing principles Basic plumbing processes Cold Water Hot water

Very well done for the abiove success so far

For the sanitation 1st mock exam you have a score of 77% which is an excellent start to being prepared for the real exam.

Your sanitation exam date will be Tuesday 11thOct
