#### The Learner Review Procedure

Each learner will have met with their Personal Tutor for a 1 to 1 review to discuss the progress they are making at college and any specific support they may require to help them achieve their targets and qualification.

As part of the review each Subject Lecturer completes a report and then the Personal Tutor summaries these in the Personal Tutor Summary. Targets are then set for each learner.

#### **Physics**

Kwabena takes Physics very seriously. He spares no pains to produce work which stands up to his potential. He has handed in his first assignment which has satisfied all the grading criteria. He is capable to work on his own, but he also participates in the group activities and contributes effectively. However, he has not handed in his second assignment and the deadline has passed.

#### Dr M K Mukherjee

#### Mathematics

Kwabena is capable of doing well in Mathematics. He understands the basic principles of the work, presented to him quickly. He is able to apply the principles to solve application related problems. At present he is working on the application of percentages. He is making good progress.

Review Term: Autumn

Review:

Kwabena is a very good student and a very good member of the group. He has supreme communication skills and these skills are often utilised to help the smooth running of the class. He has an excellent attitude and commands respect from his peers. He is also very helpful to others.

His performances on the various aspects of the course have been very good so far. He could improve even further by completeing his work more promptly. Hopefully that will be done in the second term. He should manage to complete any outstanding work before the end of January, so that he can focus on the remainder of the course and do well.

Issues Raised: Attendance has been a serious issue. It is recognised that there are extracurricular difficulties, but every effort should be made to attend all the classes.
